Focused upon providing **Better Data Faster**, Agilux Laboratories brings a new approach to method development and validation to provide rugged, timely, fit-for-purpose bioanalytical assays to support regulated studies.

Whenever possible, “true” assay performance assessments of precision, accuracy (via standard addition), specificity and stability are assessed with incurred samples.

- Using a proprietary approach, a standardized set of evaluations with imbedded, procedural and physicochemical control compounds (in all samples) to accelerate method development, yielding:

- Improved confidence in data interpretations
- Increased troubleshooting efficiencies
- Greater knowledge of **“bioanalytically relevant”** physicochemical properties/issues
- Reliable, high performance validated assays
